

Workflow Rules Spec v1

Deterministic operational rules for intake, matching, extraction, classification, and admin operation.

Core Rules

1. Only active channels are synced.
2. Message dedupe is by message_id.
3. Match priority: shipment number, thread/reference, body references, doc refs, then create.
4. If doc-ref match is ambiguous, reuse latest candidate and flag ambiguity.
5. Conservative status mode defaults ON for request/future wording.
6. Derived board status supports **In Transit** for picked-up not-delivered loads.
7. Lane target format is City, ST -> City, ST.
8. Generic customer labels are blocked; customer must be company-like proper noun.
9. Noise emails without shipment intent should be skipped.

Admin Rules

- Keep one active channel per source mailbox/folder.
- Delete duplicate channels to reduce duplicate pulls.
- Use query windows intentionally (2d for strict ops, 7d for catch-up).
- Use vocabulary for phrase mapping only, not core matching logic.
- If shipment-critical data is ambiguous, populate **Comments** on board.

Golden Test Matrix (10 Scenarios)

Baseline acceptance dataset for regression checks after each rule/code change.

ID	Scenario	Input Summary	Expected Action	Expected Status	Expected Key Fields (incl. Pickup Date / ETA / Comments)	Expected Flags
GT-001	New request no attachment	Please schedule pickup	Create	Shipment Requested	ETA=Pending, comments if ambiguous	Shipment # missing/manual
GT-002	New request with release PDF	TNSO release instructions	Create	Shipment Requested	Customer+Lane+Invoice+PO extracted	Shipment # missing/manual
GT-003	Follow-up picked up	has been picked up, carrier is X	Update existing	In Transit	US Carrier updated, ETA pending	None or forward-step flag
GT-004	Follow-up with ETA	picked up, ETA date provided	Update existing	In Transit	ETA future date, Pickup Date date-only	ETA date validation

ID	Scenario	Input Summary	Expected Action	Expected Status	Expected Key Fields (incl. Pickup Date / ETA / Comments)	Expected Flags
GT-005	Follow-up delivered	load delivered today	Update existing	Delivered	No duplicate row	None or forward-step flag
GT-006	Noise email	security/notification text	Skip	No change	No shipment created	None
GT-007	Ambiguous doc refs	PO matches multiple rows	Reuse latest candidate	Derived	No extra new row, comments note	Ambiguous match flag
GT-008	Country-only lane phrase	MX to US text	Create/Update	Derived	Lane not auto-set from country-only text	As applicable
GT-009	Generic customer labels in PDF	Picking Address present	Create/Update	Derived	Customer must be company proper noun	As applicable
GT-010	Duplicate message fetch	Same message id twice	Dedupe	No change	No duplicate mutation	None
